

Multifunctional individualists

Don't compromise

Heidolph Premium Laboratory Equipment stands for reliability, precision, and efficiency. Your demand drives us to provide the fastest service, individual support, and quality without compromise. This allows you to focus purely on your research, your company, and the millions of people worldwide.
In short: research made easy.

For us, "Made in Germany" is far more than just a marketing strategy. It is part of our company philosophy.

Our location in Germany allows us to develop and produce reliable laboratory equipment with an average operational lifespan of 10 years or more. For you, this means that every purchase is an investment in the future.

All Heidolph products are developed and manufactured at our Schwabach headquarters in Nuremberg, where they undergo multi-stage quality checks in development and production. Even in continuous operation, our powerful, no-maintenance motors ensure consistent results and prevent downtimes and expensive repairs.

To us, premium service means cost-free installation and training, the shortest possible repair and delivery times and individual expert advice – simply "research made easy".

MADE IN GERMANY

3-year warranty on all devices
and an average operational
lifespan of **10 years**

Multi-stage quality checks in
development and production

Premium service according to the
"research made easy" principle

with a non-binding and free demo to
ensure that our products meet all
your requirements.

Hei-VAP Rotary Evaporators Developed with users

In close cooperation with users, we developed the Hei-VAP series of rotary evaporators with an emphasis on the essentials: well thought-out details with a focus on features and functions to facilitate everyday laboratory work.

Versatile combinations with glassware and extensive accessories offer the right configuration for every application. Perfectly matched peripherals top off the rotary evaporators – complete systems, all from one source. During a personal consultation, we address your individual requirements from best configuration to process optimization by our application specialists – upon request also on site.

Leading Safety Standards

- All Hei-VAP rotary evaporators have a safety heating bath with overheating and dry running protection, ergonomic handles, double wall and an integrated spout
- Universal heating bath for all flask sizes up to 5 l (no retooling required). The sturdy metal connection to the device's base allows variable distances for the heating bath up to 200 mm without tilting
- Digital displays allow continuous monitoring of the current values and, thanks to protection class IP 42, protect the electronics reliably against dripping water and dust
- Separate knobs with intuitive LED ring light system not only allow visual process control, but also direct intervention in the evaporation process at any time
- The locking function of the knobs prevents unintentional adjustment of the values
- Residual heat indicator: When the function is deactivated and in standby mode, flashing and the display of the residual heat warn of the risk of burns ($> 50^{\circ}\text{C}$)
- The standby button stops all functions and, when using a motor lift model, lifts the evaporating flask from the heating bath
- In order to prevent short circuits and corrosion systematically, the cable connections of the operating panel and the heating bath comply with the high protection class IP 67
- Additional safety from a single source: From the transparent plastic coating of the glassware to guard shield and guard hood (implosion protection) to IQ-OQ documentation and certification

Superior Ease of Use

- All models are available with hand or motor lift
- The patented flask clamp Easy-Clip facilitates attaching and changing of the evaporating flask. The mechanism gently separates ground glass joints to prevent glass breakage
- The versatile operating concept meets all requirements with digital display or touch display
- Intuitive operation, as all settings are configured centrally on the operating panel. In combination with the Control-Box, the panel can even be used as the central control unit to regulate the vacuum and the Hei-CHILL recirculation chiller as well
- The detachable panel with optional extension cable and holding device allow quick and easy operation even outside closed fume hoods
- Easy ventilation thanks to the ground-free condenser design: The ventilation cap with PTFE inlay and threaded connection avoids stuck glass – without grease. Optionally, a venting valve with refill function is also available
- FDA-compliant materials for all active and passive media-contacting components permit a broader range of application and research at the highest level
- Convenient release for individual adjustment of the angle of inclination from 20° to 80° and height stop to limit the immersion depth up to 160 mm
- The optionally available automatic module Distimatic permits fully automatic distillation in unattended continuous operation

Reduced Cost of Ownership

- No unnecessary additional costs: The patented clamping sleeve effectively prevents the vapor tube from getting stuck in the drive
- With the patented Easy-Clip's integrated screw thread, stuck evaporating flasks can be released safely and easily
- Ground-free condenser design with grease-free threaded connections
- The highly resistant and particularly durable PTFE vacuum seals achieve maximum tightness and reduce expenses for spare parts in the long run
- The unique tightness of the vacuum system leads to shorter process times, reduced energy costs and purest results
- The universal heating bath is suitable for all flasks up to 5 l, without additional costs for retrofitting
- Even greater efficiency with up to 40 % higher evaporation rates: The intelligent design of the XL condenser provides 57 % more cooling surface at almost the same height as previous standard vertical condensers
- Quality that pays. Corrosion-free die-cast housings with condensation-repellent varnish and maintenance-free motors guarantee unrestricted continuous operation and a long lifespan with significantly lower maintenance costs
- Media-contacting plastic parts such as the screw connection for mounting the condenser and the clamping sleeve on the vapor tube are made of highly resistant PPS to ensure a long lifespan
- Many of the current series' spare and wear parts are forward and backward compatible with earlier models

MADE IN
GERMANY

All benefits at a glance

3-year warranty on all devices and an average operational lifespan of over 10 years

Intelligent Evaporation

Ground-free condenser: Ventilation cap with PTFE inlay and threaded connection prevents stuck glass

The right operating concept for all requirements: with digital display or innovative touch display. Also available as Control model with additional control of vacuum and Hei-CHILL recirculation chiller

For quick access, all models also have separate knobs with LED rings showing the active functions

Up to 40 % higher evaporation rate with a cooling surface of 2,200 cm² for all XL glass condensers

Highly resistant and durable PTFE vacuum seals for many years of continuous operation

Patented connection system with Easy-Clip to gently screw-off flasks and vapor tube with clamping sleeve prevent stuck glass parts

The 210 °C safety heating bath with ergonomic handles and pour spout shuts down when running dry or at over temperature > 5 °C

Cable connections with protection class IP 67 protect against corrosion and short-circuits

For unlimited evaporation: In conjunction with the Distimatic automatic module, you can distill indefinitely and automatically in 24 / 7 operation. The affordable alternative to large rotary evaporators.

With standby function and residual heat warning at heating bath temperatures above 50 °C

Metal connection to the device console prevents tilting of the bath

The Hei-VAP series – one concept for all requirements

Standard Models

Without vacuum control. For integration into an existing vacuum system or for configuration with optional vacuum controller.

Hei-VAP Core

- Digital display
- Direct access to rotation and heating bath temperature
- Lock function
- Standby button
- Residual heat warning

Hei-VAP Expert

- 5" touch display
- Clear display of all values (Basic/Advanced modes)
- Timer
- Max. temperature limitation
- Multilingual menu with text warnings
- Optional display of vapor temperature
- USB and Micro SD interfaces

Hei-VAP Ultimate

- 7" touch display
- Clear display of all values (Basic/Advanced modes)
- Timer
- Max. temperature limitation
- Multilingual menu with text alerts
- Optional display of vapor temperature
- USB and Micro SD plus LAN/RS 232 interfaces (Lab 4.0 ready)

Control Models

Including the smart Control-Box. For controlling any connected vacuum sources and the Heidolph chillers directly via the rotary evaporator's operating panel.

Hei-VAP Expert Control

- Extends the functions of the Hei-VAP Expert by:
- Control of any vacuum sources and Heidolph recirculation chillers
 - Solvent library
 - Favorites memory
 - DAA (see page 16)
 - Ramp programming

Hei-VAP Ultimate Control

- Extends the functions of the Hei-VAP Ultimate by:
- Control of any vacuum sources and Heidolph recirculation chillers
 - Solvent library
 - Favorites memory
 - DAA (see page 16)
 - Ramp programming

The Hei-VAP Control principle

Hei-VAP Expert Control and Ultimate Control allow to centrally control all process parameters: vacuum, cooling temperature, rotation and heating bath temperature.

Evaporate with a tap:

- Customizable solvent library
- Automatically find boiling points with Dynamic AUTO_{accurate}
- Simply save processes as favorites

Hei-VAP Expert Control
Hei-VAP Ultimate Control

* A subsequent upgrade is possible: simply connect the "plug-and-play" Control-Box and enjoy all the benefits.

Hei-VAP Core

Uncompromising quality and simple handling

An operating concept that is focused on the essentials: clear and with access to the basic parameters rotation speed and heating bath temperature at any time.

- Clear digital display showing actual and set values
- Two separate knobs with dynamic control for setting the rotation speed and heating bath temperature: fast turning for large jumps, slow turning for precise setting of the set values
- Accidental changing of the values can be prevented by the lock function
- Intuitive LED ring light system makes activated functions clearly visible even from a distance
- Easy adjustment of the immersion depth up to 155 mm and the inclination angle from 20° to 80°
- Standby function and residual heat warning at heating bath temperatures above 60 °C
- Available as hand or motor lift models

The standby button stops all functions and, when using a motor lift model, lifts the evaporating flask from the heating bath.

Hei-VAC Control
The optional digital vacuum controller for accurate vacuum control of house vacuum systems or any other valve-regulated vacuum pump

Hei-VAP Expert/Ultimate

With a clear 5" and 7" touch display

Always have a clear view of all values with the Hei-VAP Expert

- Central operating panel with 5" touch display
- Clear display of all values (Basic and Advanced modes)
- With timer, limitation of max. temperature, multilingual menu and text display for error messages
- Separate knobs for rotation and heating with locking function to prevent accidental readjusting
- LED ring lights and pictogram to display the activity even from a distance
- Integrated solvent library to facilitate adjustment of the required vacuum on an external vacuum controller
- USB and Micro SD interfaces
- Optional display of vapor temperature

Subsequent upgrade to Hei-VAP Expert Control possible, including vacuum and chiller control

Precise setting of rotation speed and heating bath temperature on the digital touch display or – for quick access during an active process – directly via the knobs on the operating panel.

Hei-VAP Expert Control /Ultimate Control

Central control unit for uncompromising precision

Adds numerous smart features to the Hei-VAP Expert, as well as an overview of all parameters and the current process

Hei-VAP Expert Control

- 5" touch display for controlling the entire system including the vacuum and the cooling temperature
- For precise monitoring, the pictogram on the display also symbolizes active functions
- Separate knobs for quick access: the right one for direct vacuum control, the left one for the rotation
- Setting of values either via the touch display or the separate quick access knobs
- Direct access to two favorites on the start screen
- Expandable solvent library. You can also transfer your own favorites to other devices using a USB stick
- Define and save own evaporation processes (ramps)
- Automatically evaporate with the Dynamic AUTO_{occurens} Program (DAA). Convenient and customizable: from foam avoidance to highly efficient evaporation
- With USB and Micro SD interface for easy installation of software updates and transfer of individual favorites from one device to another

Central control panel for direct regulation of any vacuum source – in conjunction with a Hei-CHILL recirculation chiller also the cooling temperature. With solvent library, favorites, individual ramps and smart program automations.

Hei-VAP Ultimate Control differs from the Hei-VAP Expert Control:

- 7" touch display for controlling the entire system including the vacuum and the cooling temperature
- USB and Micro SD plus LAN / RS 232 interfaces (Lab 4.0 ready)

Save time with the automated process control

Automatic evaporation with Dynamic AUTOaccurate (DAA)

- The boiling points of one or more fractions are identified through the steam temperature gradation of the mixture during continuous automatic pressure control
- You can freely set whether one or more fractions are to be distilled. The vacuum control is fully automated for each fraction
- You can control the evaporation speed by adjusting the ratio of steam temperature to cooling temperature

The DAA allows you to start a fully automated distillation process already during the heat-up phase of the heating bath. The system vacuum is dynamically adjusted to the changing heating bath temperatures until the heating bath has reached its defined temperature.

- Samples are distilled precisely
- Automation with sensors ensures noticeably higher precision
- To protect your sample, motor lift models automatically remove the evaporating flask from the heating bath at the end of the process

System requirements:
The automatic process control requires a Hei-VAP Expert Control or Hei-VAP Ultimate Control model with the AUTOaccurate-sensor as well as the configuration with compatible glassware (G3, G3 XL or G6).

Favorites and ramps

- Solvent library with pre-set, customizable processes and solvents. Can be saved as a favorite at any time, also directly on the start screen
- Evaporate with a tap: the smart DAA program
- Individual settings: adjust hysteresis (from gentle to highest performance), limit max. pressure or temperature, multilingual menu with format settings, various calibrations, assign heating temperature or vacuum to right knob

Accessories

Guard hood
Strong and transparent guard hood to protect from implosions; provides easy and immediate access to flask and bath; application range up to 130 °C
P/N 569-00010-00

Guard shield
Strong and transparent guard shield to protect from implosions; provides easy and immediate access to flask and bath
P/N 569-00020-00

Aqua-Stop
Automatically stops the water supply as soon as the rotary evaporator is switched off. Prevents excessive water consumption and water damage and also reduces costs
P/N 569-00500-00

Ventilation and replenishment valve
Ground-free, for precise refilling during the process. With ventilation function
P/N 514-51100-00

Extension cable
Allows quick and easy operation even outside closed fume hoods, length 1.5 m
P/N 14-300-020-12

Holding device
For all Hei-VAP operating panels: can be positioned next to the device or on the wall. Extension cable required
P/N 569-01000-00-0

Spare vapor tube
Standard joint size: NS 29/32 (NS 24/29 ground joints available on request)
P/N 514-00000-01
Spare clamping sleeve
P/N 23-30-01-05-31

Tubing
Tubing set with 12 m tube and hose clamp for vacuum and water connection
P/N 591-35000-00
Tubing by meter (individual length)
P/N 591-33000-01

Vacuum seal PTFE/FFKM
Special PTFE seal (with FFKM sealing ring), highest chemical resistance, long lifespan without abrasion, highest density, FDA-compliant
P/N 23-30-01-06-70
Standard PTFE/FFKM spare seal
P/N 23-30-01-01-30

Woulff bottle
For separating condensate to protect the valves of the vacuum pump, standard vacuum laboratory bottles can be used. Screw connection for easy emptying and cleaning, compatible with all Hei-VAP configurations, volume of 200 ml
P/N 569-00071-00

Vacuum valve
Required for Hei-VAP Control models with valve-controlled vacuum pump. Can be positioned for easy access and cleaning. Not required for manual vacuum control
P/N 569-00065-00

Switchbox
Connect up to three rotary evaporators to one vacuum pump
If no vacuum is required or when the required vacuum has been reached, the pump is switched off automatically. Prevents excess energy consumption. For applications with different pressure settings, each evaporator must be equipped with vacuum valve and non-return valve. Delivery includes three non-return valves. Suitable only for Hei-VAP Control models
Weight 0.6 kg, w/d/h 80×45×160 mm
P/N 569-00400-00

Heating bath liquid
Heating bath liquid up to 220 °C (5 l)
P/N 569-00600-0

AUTOaccurate-sensor
For Hei-VAP Expert Control and Hei-VAP Ultimate Control. Only in combination with glassware set G3, G3 XL or G6
P/N 569-00040-00

Vapor temperature sensor
For Hei-VAP Expert and Hei-VAP Ultimate as well as Control models
P/N 569-00030-00

UPGRADE

Control-Box
Subsequent upgrade for Hei-VAP Expert and Hei-VAP Ultimate models with Control function and the ability to control peripheral devices (vacuum and Hei-CHILL recirculation chiller)
P/N 569-00200-00

Vacuum controller

Manual vacuum controller

The cost-effective variant for vacuum control

- Control the house vacuum or any other vacuum source manually
- Pressure range from 0 to 1,020 mbar in 50 mbar increments
- Connection for tubes with 8 mm inner diameter
- Support rod for mounting of the controller on the evaporator included
- A vacuum valve is not required
- W/d/h 80×80×150 mm

P/N 591-26000-00

Hei-VAC Control

For accurate vacuum control of house vacuum systems or valve-regulated vacuum pumps

- Entry-level model for digital vacuum control
- Easy installation on the evaporator's condenser shaft or as stand-alone device with base next to the evaporator unit
- Manual vent button to prevent foaming
- Graphs to display the entire vacuum process
- RS 232 interface
- Multilingual menu navigation
- Compatible with all Hei-VAP Evaporators which do not have an integrated vacuum control
- Vacuum controller complete with integrated ceramic diaphragm vacuum sensor, regulation valve and venting valve (control valve included in delivery). Ready for use, with wall power supply and user manual

P/N 591-00360-00

Vacuum pumps

Valve-regulated vacuum pumps

- All components that come in contact with media are made from chemically resistant fluoropolymer
- The durable PTFE design guarantees a superior diaphragm lifespan
- Head cover and clamping disc have a stable core made from metal that offers unsurpassed long-term performance
- The direct pump drive (without belt) has no wear parts, is exceptionally quiet and creates a very low vibration environment
- The physically optimized gas ballast valve prevents from condensate collecting in the pump

RPM-regulated vacuum pumps

- Highest distillation rates possible and reducing process time by 30 %
- Solvent recovery of up to 99 %
- Once the required vacuum is reached, the pump automatically stops and reliably keeps the vacuum at the desired level
- Minimized runtime saves energy and significantly increases the lifespan of the diaphragm
- These pumps guarantee minimum noise and vibrations during operation
- Rpm-regulated pumps achieve the most precise vacuum

Valve-regulated vacuum pumps

Rotavac Valve Tec

For all Hei-VAP models

- Recommended for solvents with low or medium boiling points
- Vacuum can be controlled through valves or manual vacuum controllers
- A vacuum valve is necessary if you wish to combine this vacuum pump with Hei-VAP Expert Control/Ultimate Control rotary evaporators

P/N 591-00160-00

Rotavac Valve Control

For all Hei-VAP models

- Suction capacity for up to three rotary evaporators at the same time
- Vacuum can be controlled through valves or manual vacuum controllers
- Depending on your application, you can use the Switchbox to turn the vacuum pump on and off
- A vacuum valve is required to combine this vacuum pump with Hei-VAP Expert Control/Ultimate Control rotary evaporators

P/N 591-00130-00

Condenser

P/N 591-00083-00

	Rotavac Valve Tec	Rotavac Valve Control

Ultimate vacuum	12 mbar	7 mbar
Combinable with condensor	yes	yes
Power input	80 W	180 W
Weight	6.0 kg	12.8 kg
Dimensions without condenser	w/d/h 145 × 315 × 185 mm	195 × 245 × 310 mm

Rpm-regulated vacuum pumps

Rotavac Vario Tec

For Hei-VAP Expert Control/
Ultimate Control models
(direct control via rotary evaporator)

- Recommended for solvents with low or medium boiling points

P/N 591-00171-00

Rotavac Vario Control

For Hei-VAP Expert Control/
Ultimate Control models
(direct control via rotary evaporator)

- Even if the gas ballast valve is open, an excellent ultimate vacuum is reached when working with easily condensable vapors
- This makes distilling high boiling point solvents such as DMF or DMSO possible at low heating bath temperatures

P/N 591-00141-00

Rotavac Vario Pumping Unit

For Hei-VAP Core models

- Fully adjustable, stand-alone pumping unit including vacuum pump and vacuum controller
- Precise vacuum control prevents bumping and loss of your samples
- Thanks to the automatic vacuum supply to the process parameters, you have more time for important laboratory activities

P/N 591-00142-00

Condenser

Recirculating Chillers

The Hei-CHILL models with cooling capacities from 250 to 1,200 W are specifically designed for reliable continuous operation in the laboratory. The magnetic coupling of the pump and the electric motor prevents leakages.

Easy to use

- Clearly arranged control elements, large LED display, membrane keypad and window for monitoring the thermal fluid level
- With a large coolant reservoir to compensate for peak performance during the evaporation process

Hei-CHILL 250

The compact design fits effortlessly on a laboratory bench, cooling capacity at 250 W
P/N 591-01600-00

Hei-CHILL 350

The compact design fits effortlessly on a laboratory bench, cooling capacity at 350 W
P/N 591-01610-00

Hei-CHILL 600

With rollers for placement under a lab bench, cooling capacity at 600 W
P/N 591-01620-00

Hei-CHILL 1200

With rollers for placement under a lab bench, cooling capacity at 1,200 W
P/N 591-01630-00

Accessories

Kryo 30 liquid

Non-flammable thermal fluid for Hei-CHILL recirculating chillers, 10 l
P/N 569-00611-00
20 l
P/N 569-00610-00

RS 232 cable

To connect a Hei-CHILL to a Hei-VAP Expert Control/Ulimate Control
P/N 14-007-040-72

(No image)
Enforced cooling tube
For cooling, inside Ø 9 mm, sold by the meter, for operating temps of -20 to +60 °C
P/N 591-38000-00

Large-Scale
Rotary
Evaporators

Hei-VAP Large-Scale Rotary Evaporators

Leading Safety Standards

The safety glass in the protective hood of the evaporating flask, and the PMMA safety screens covering the glass set and cassettes of the receiving flask, protect against shards in the event of an implosion. The operating panel displays all safety-relevant functions that must be met at start-up. In the event of excess pressure or excess temperature, the system turns off the relevant functions. A sensor checks the fill level at immersion into the heating bath to prevent overfilling.

Superior Ease of Use

Intuitive touch display for monitoring all parameters and functions for program-controlled distillation. Can be safely and easily operated by a single person: EASY LOCK flask attachment with adjustable tray for all evaporating flask sizes up to 20 liters, drain valves at the receiving flasks, automatic water bath refill system, and optional fully-maneuverable base cart.

Reduced Cost of Ownership

The complete glassware and all accessories such as vacuum controller, vacuum valve, vacuum sensor, and vapor temperature sensor are included in delivery. Water or oil – the universal heating bath can be used for both. The unique tightness of the system increases the flow capacity while decreasing energy consumption at the same time.

Hei-VAP Industrial YOUR BENEFITS

- With integrated vacuum controller and clearly arranged touch display for intuitive definition of all process parameters
- Safety features prevent accidental start-up of the process
- Smart details ensure easy and safe operation even by a single person on their own

TIP: Processes can be fully automated in combination with the automatic module Distimatic with automatic residue drainage. For unlimited, continuous distillation during unsupervised continuous operation all day, every day, 24/7.

Hei-VAP Industrial

Process large volumes easily and safely

Large scale Hei-VAP rotary evaporators can be operated in batch operations with flask sizes up to 20 liters. The many safety features and easy operation allows for safe user interaction and convenience – even with one operator. Our application consultants can advise you on process optimization techniques as well as configuring a perfect all in one package.

- Change flasks safely and simply with the EASY LOCK flask attachment
- Intuitive touch display with an overview of all parameters
- With timer, ramp function, and two programs for process control: SETpressure and AUTOaccurate
- Fully equipped, including glassware, vacuum controller, vacuum valve, and vacuum and vapor temperature sensor
- Outstanding safety features, both on the housing as well as via the safety features on the touch display
- More time through excellent efficiency – with the automatic module Distimatic, even unsupervised continuous operation is possible all day, every day

Maximum performance with systems that perfectly complement each other. Discover the Hei-CHILL range at www.heidolph.com
